PROFESSIONAL SUMMARY

CTO and Senior Software Engineer with 8+ years of experience building and shipping mobile, web, ERP and SaaS platforms, with 250+ software projects delivered and apps live on the App Store and Google Play. Designed, built and developed **Nubni** solo (nubni.com), an AI platform that generates software from voice or text. At CodeWealth I own technology end to end for every client project across FinTech, Healthcare, ERP, Logistics, Food and Education for clients in Egypt, Saudi Arabia, the UAE, Libya and Spain. I write the FRS and SRS, plan delivery, design architecture, code, lead the team, meet customers, and run production DevOps: Docker containers, server monitoring, security hardening and automated recovery.

CORE SKILLS

Languages: Python, JavaScript, TypeScript, Node.js, PHP, Dart, Java, SQL

Mobile: Flutter, React Native, Android, iOS, Firebase, App Store & Google Play publishing

Web & Backend: Angular, Next.js, React, Python, Laravel, Strapi, REST APIs, WebSockets, HTML/CSS

Databases: PostgreSQL, MySQL, Redis, Firebase

DevOps & Security: Docker, Linux servers, Nginx, CI/CD, server health monitoring, Bash automation scripts, firewall rules & IP blocking, Git

Integrations: Paymob, Fawry, Geidea, OTP/SMS gateways, Google Maps

AI & LLMs: OpenAI GPT, Anthropic Claude, Gemini, DeepSeek, Mistral, streaming AI chat, speech-to-text, MCP, AI code generation, Cursor AI, Android Studio, VS Code, Figma handoff

Leadership: Technical leadership, FRS & SRS writing, project planning, Agile/Scrum, code review, mentoring, client meetings

PROFESSIONAL EXPERIENCE

Creator & Sole Engineer – Nubni AI Platform LIVE

2024 – Present (2 years)

Nubni – nubni.com – AI-powered software generation SaaS

Egypt

- Designed and built the whole product alone: Python backend, Angular web app and Angular admin dashboard, PostgreSQL and Redis.
- Users describe software by voice (Arabic or English) or text. A step-by-step wizard and an AI planner draft a plan; after the user approves it, Nubni generates, edits and deploys mobile apps, websites, dashboards and APIs in Flutter, React, Angular, Vue, Strapi or Node.js.
- Multi-model AI chat with streaming replies and file attachments across GPT, Claude, Gemini, DeepSeek and Mistral, plus bring-your-own API keys, MCP servers and reusable skills.
- Built-in Monaco code and endpoints editor, GitHub import and repo sync, APK / IPA mobile builds, virtual Android, iOS and browser devices, cloud servers, custom domains and hosting.
- SaaS layer: subscription plans with AI-token metering, teams with roles and permissions, Paymob and Vodafone Cash payments, support chat, and admin approval and audit logs.

Chief Technology Officer (CTO) & Lead DevOps Engineer

2025 – Present

CodeWealth – Software Engineering & Digital Products

Sheikh Zayed, Egypt

- Own technology, delivery and coding for the whole CodeWealth portfolio: websites, mobile apps, dashboards, ERPs and backends.
- Write the FRS and SRS for every project, then plan scope, milestones and sprints and turn them into architecture and team tasks.
- Built and deployed the CodeWealth platforms myself, including Amlak Finance, Tiba ERP, Rakny, DentaLux, Eqraa & Ertqee, Shajarat Al-Durr and Al-Rowad.
- Lead and mentor the engineering team, run code reviews, and meet customers for discovery, demos, change requests and sign-off.
- DevOps: deploy every project to production with Docker, monitor servers, harden them with firewall rules and malicious-IP blocking, and run health-check and auto-recovery scripts after downtime (payment delays, provider infrastructure updates).
- Delivered integrations including Paymob payments, OTP providers, real-time WebSockets and App Store / Google Play releases.

Senior Software Developer
2025 – 2026 (1 year)

Sigma
Mall of Arabia, Giza, Egypt

- Senior developer on **Red Bull MOBILE Saudi**, the telecom self-care app for Android and iOS (Google Play · App Store).
- Built features and improvements for plan and line management, add-ons, the Giga Coins rewards program, invite and earn, and retention offers.
- Worked on performance, stability and bug-fix releases through the 3.0 app refresh, in agile sprints with QA, product and backend teams.

Senior Software Developer
Oct 2024 – Jun 2025

Shelter Investment Group (Shelter Technology)
Cairo, Egypt

- Built and published apps, all live on the App Store and Google Play, across healthcare, fitness, events and file sharing: CureSuite, CureSuite Clinic, PT-Finder, PT-Finder Trainer, Five Fits, Five Fits Trainer, LA7, Absi and Wee in.

Software Development Team Leader
Mar 2023 – Jul 2024

Geomama
Giza, Egypt

- Led software projects to on-time, high-quality delivery, mentored the team and introduced agile practices that improved delivery speed.

Senior Flutter Developer
Oct 2023 – Jan 2024

Helpoo
Cairo, Egypt

- Developed, tested and maintained the Helpoo roadside-assistance app (live on Google Play) and worked on the Helpoo Driver app (App Store & Google Play) and admin tool.
- Reduced Google Maps API costs with a smarter integration while keeping the same user experience.

Senior Flutter Developer
Dec 2020 – Mar 2023

e& (Etisalat Misr)
Cairo, Egypt

- Built high-performance Flutter apps including Etisalat Sports and Etisalat Games; ran code reviews, mentored juniors and wrote unit and integration tests.

Flutter Developer / IT Manager
Aug 2018 – Jun 2019

ICS
Cairo, Egypt

- Built scalable Flutter apps, led architecture decisions, integrated third-party SDKs and APIs, and improved CI/CD.

Freelance Mobile Application Developer
Aug 2018 – Sep 2023

Self-employed
Cairo, Egypt

- Delivered apps, e-commerce stores and dashboards for clients in mobility, retail, real estate and media.

Teaching Assistant
Sep 2018 – Jan 2019

Misr University for Science and Technology
Giza, Egypt

LIVE ON THE APP STORE & GOOGLE PLAY

Published apps: Red Bull MOBILE Saudi · DentaLux & DentaLux Driver · CureSuite & CureSuite Clinic · PT-Finder & PT-Finder Trainer · Five Fits & Five Fits Trainer · LA7 · Absi · Wee in · Helpoo & Helpoo Driver. Store links and screenshots for each are in the portfolio.

KEY PROJECTS – screenshots, scope & role for each at the portfolio link above

Amlak Finance – FinTech mortgage platform with underwriting and collections · Next.js, Strapi, PostgreSQL.

Tiba ERP – Arabic-first ERP for Libya, Egypt and KSA, with an offline desktop app · Next.js, Node.js, PostgreSQL, Redis.

Rakny – Smart parking & valet: POS app, customer app, admin, backend · React Native, WebSockets, Paymob. Live.

DentaLux – Healthcare marketplace: customer and delivery apps, vendor portal, admin, backend. Live on both stores.

Also led: Eqraa & Ertqee (education ERP + Mushaf app), Shajarat Al-Durr (genealogy), Al-Rowad (B2B ordering), L-RafeeQ (auto-finance network: apps and dashboards), Savoro (restaurant ecosystem, Spain), Bahr (logistics ERP + HR app), Ciatto and Olfa (food and café delivery apps), Instabid (bidding marketplace), Elite / Majan (mall platform), and the CodeWealth website.

Earlier work: Etisalat Sports, Etisalat Games, Voya Rider & Driver, CRVD ERP (Laravel), CRVD AI Platform, Twfeer SaaS, bomaz-mart, OCD Express, Naeem, Elevated House (KSA), ESEGO, AL-NASR, Avenue Real Estate and many more.

EDUCATION

B.Sc. Computer Science – GPA 3.88 / 4.0
2014 – 2018

Misr University for Science and Technology
Giza, Egypt

Graduation project: voice-controlled medical robot with X-ray detection and vital-sign sensors. **Course:** Oracle Java (J2SE, J2EE, ADF I & II), 2017.

Languages: Arabic (native) · English (professional working proficiency)
